About Us

Who We Are

We are a professional mineral sourcing and supply company based in Pakistan. With strong connections in key mining regions, we provide high-quality rare earth and industrial minerals to local and international markets.

Our focus is on delivering consistent quality, transparent dealings, and long-term business relationships. Every product we supply is carefully selected and verified to meet industry standards.

Why Choose Us

- ✓ High-quality mineral sourcing
- ✓ Direct access to mining regions
- ✓ Competitive pricing
- ✓ Reliable supply chain
- ✓ Customer-focused approach

Our Minerals Products

Introduction

We offer a wide range of rare and industrial minerals that are essential for modern industries, electronics, and advanced technologies.

Fergussonite

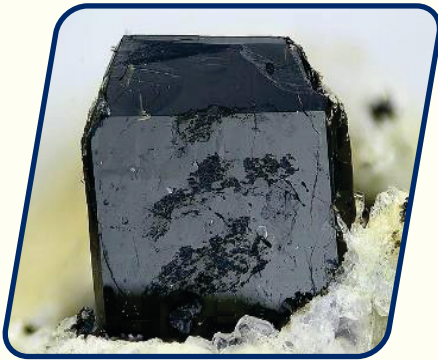

A rare mineral rich in niobium and yttrium, widely used in high-tech industries and advanced materials.

Monazite

An important source of rare earth elements, commonly used in energy, magnets, and electronics.

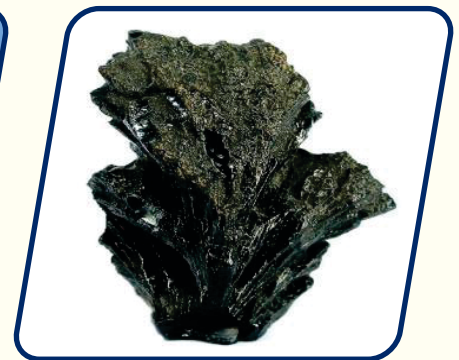

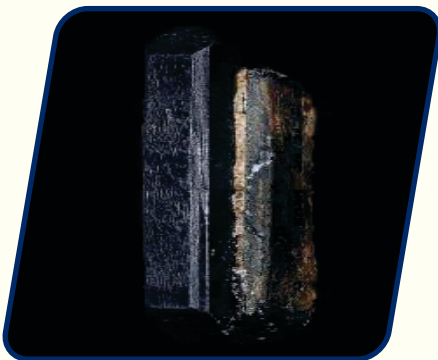

Allanite

A complex silicate mineral valuable for geological studies and rare earth extraction

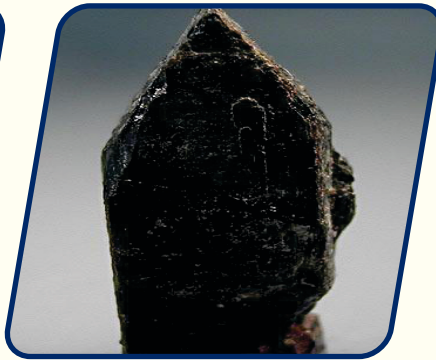

Samarskite

A rare mineral containing uranium and rare earth elements, used in specialized industries.

Euxenite

Contains niobium and tantalum, essential for electronics and industrial applications.

Bastnasite

One of the main sources of rare earth elements used in modern technology and manufacturing.

Metallic Minerals

- Copper Ore (Cu)
- Gold Ore (Au)
- Silver (Ag)
- Iron Ore
- Chromite
- Lead & Zinc
- Molybdenum
- Antimony
- Rare Earth Elements

Industrial Minerals

- Silica Sand
- Gypsum
- Coal

Natural Stones & Decorative Minerals

- Marble
- Granite
- Onyx
- Nephrite
- Ghoshti
- Dark Pink Stone
- Medium Pink Stone
- Light Pink Stone

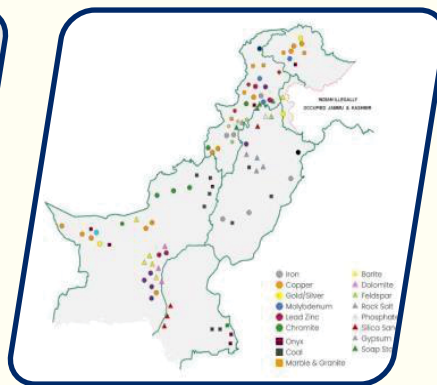

Our Mineral Sources (Pakistan)

Introduction

Our minerals are sourced from the most mineral-rich regions of Pakistan, known for their natural reserves and geological diversity.

Gilgit-Baltistan

Gemstones		
Variety of gemstones are found in Pakistan. Their focal point is Northern Areas, KPK, Balochistan		
Location	Gem Types	
KPK	Kohistan	Peridot
	Swat	Emerald, various types of quartz, Epidote
Balochistan	Chaman	Diamond quartz
	Kharan	Anatase, Brookite, Quartz
Northern Areas	Chilas	Zircon, Aquamarine, Tourmaline, Rutile quartz, Alluvial diopside
	Gilgit, Hunza Valley	Aquamarine, topaz (golden & white), Ruby, morganite, apatite, spinel, pargasite.

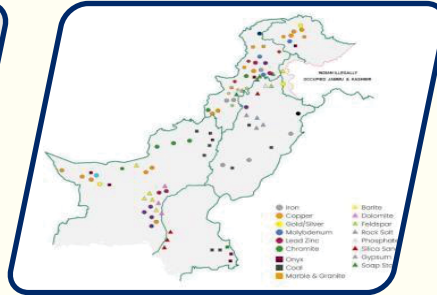

Famous for its high-altitude mountains and pure mineral deposits. This region produces rare and high-quality natural minerals.

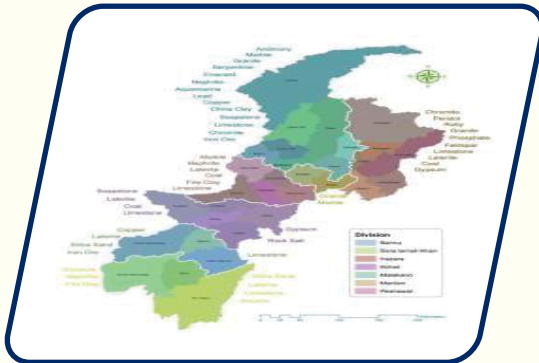

Balochistan

Gemstones		
Variety of gemstones are found in Pakistan. There focal point is Northern Areas, KPK, Balochistan		
Location	Gem Types	
KPK	Kohistan	Peridot
	Swat	Emerald, various types of quartz, Epidote
Balochistan	Chaman	Diamond quartz
	Kharan	Anatase, Brookite, Quartz
Northern Areas	Chilas	Zircon, Aquamarine, Tourmaline, Rutile quartz, Alluvial diopside
	Gilgit, Hunza Valley	Aquamarine, topaz (golden & white), Ruby, morganite, apatite, spinel, pargasite.

A major mineral hub of Pakistan with vast deposits and consistent supply capabilities.

Khyber Pakhtunkhwa (KPK)

Rich in diverse mineral resources formed through unique geological conditions.

Punjab

Known for industrial minerals and strong infrastructure, supporting efficient extraction and delivery.

Our Mine Sites Aeras

Introduction

Our mining operations are located in Pakistan's most mineral-rich regions. Each site is selected for its geological value, ensuring high-quality extraction, reliable supply, and consistent industrial grade minerals for our clients.

Gilgit-Baltistan Mine Sites

Chilas (Diamer District)

Chilas mine site is located in a highly mountainous region known for its rich and rare mineral formations. The area provides high-quality raw mineral resources due to its unique geological structure.

Khyber Pakhtunkhwa Mine Sites

Kohat

Kohat is an important mining zone in KPK, known for its mineral-rich hills and stable extraction environment. It supports consistent supply for industrial use.

Karak (South of Kohat)

Karak region is famous for its rugged terrain and mineral deposits. It plays a key role in our overall mineral production network.

Balochistan Mine Sites

Khuzdar

Khuzdar is one of the major mineral-producing regions of Balochistan. It offers large-scale reserves and contributes significantly to industrial mineral supply.

Punjab Mine Site

Mianwali

Mianwali, located in the Salt Range region, is well-known for its industrial minerals. Its strategic location allows efficient extraction and transportation.

Our Services

What We Offer

- Mineral sourcing
- Bulk supply
- Export services
- Quality inspection
- Client support

We provide complete solutions from extraction to delivery, ensuring smooth and reliable service.
